# Updating ImageJ plugins

Christian Bowman
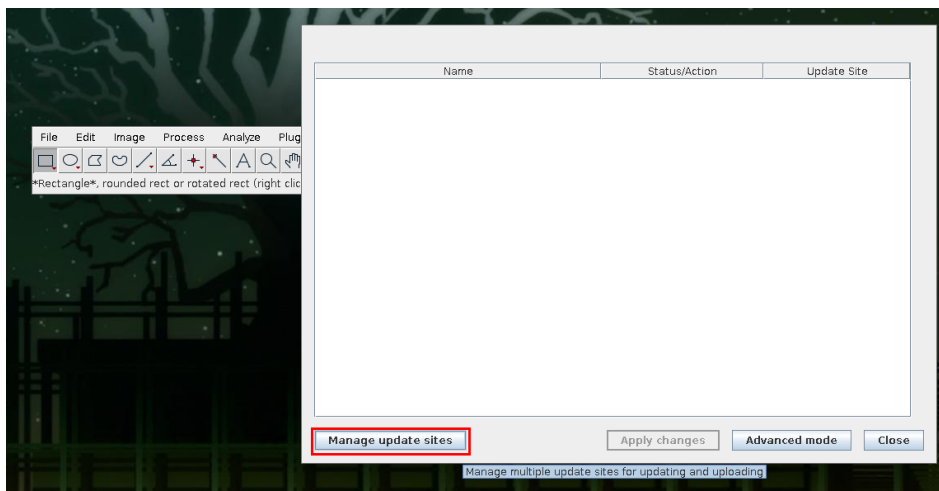

Updating ImageJ plugins
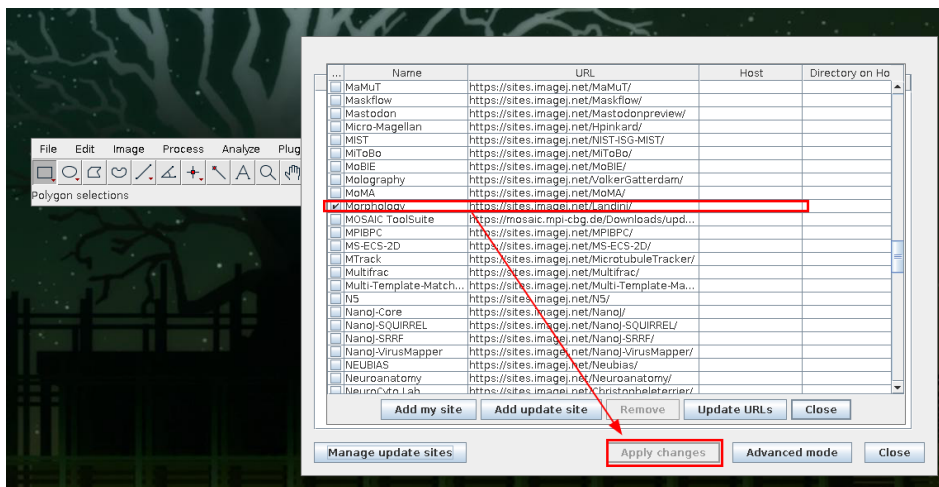

Instructions:

1. Open ImageJ/ FIJI

2. Go to "Help" on the far right. Scroll down and click "Update..."

3. Select "Manage update sites"

4. Scroll through the list and add "BioVoxxel" and "Morphology", then click "Apply Changes"

5. It should load some new files and give you a prompt to restart ImageJ/ FIJI. Restart ImageJ/ FIJI for the plugins to take effect.

6. You should should now be able to use the "BioVoxxel" and "Morphology" plugins in your macros or through the menus ("Plugins" > "Morphology" > "Particles8")
